## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to applicants remarks dated 1-16-03

In response to applicant's argument that there is no need for a water tight container in the Labur because water does not play a role in the Labur device, and that the examiners belief that it is obvious to incorporate a foam layer into the device of Labur is not obvious as perceived by the applicants representative, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

The examiner still of the opinion that the rejection present 1-16-03 is sound and that the claims presented by the applicant are obvious in view of the prior art of record. Although the container (12) is not disclosed as a container for water it is disclosed as being air tight which is inherently water tight and therefore meet the claims of being water tight.

As to the applicant comments directed to a foam liner note lines 35 to 40 of Column 5 which suggest an option of a foam liner between the casing and the bladder. The optional feature is the limitation which requires the rejection to be made under 35 USC 103.

The examiner acknowledges the submission of a new Declaration.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3764

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over  
Labur in view of Kuo.

The claims are rejected for the same reasons as set forth in the previous office  
action of 12/24/02.

Any inquiry concerning this communication should be directed to Jerome  
Donnelly at telephone number 308-2668.
